

## TEST REPORT

Page 1 of 3

### SUMMARY OF TEST REPORT

**TEST REPORT NO:** ALPL202009071

**DATE:** 07/12/2020

(No of pages in the test report: Page no. 1 to 116)

**TEST FORMAT AS PER IS 13252 (PART 1): 2010 + A1: 2013 + A2 : 2015 / IEC 60950-1: 2005 + A1: 2009 + A2 : 2013**

**1. Name of the manufacturer:** GlobTek (Suzhou) Co., Ltd

**2. Product:** Power Adaptors for IT equipments

**3. Lead model:** GTM91099-6048-T2

**Series model:** GTM91099-3009-4.0-T2, GTM91099-6015-3.0-T2, GTM91099-6015-1.2-T2, GTM91099-6015-T2, GTM91099-6024-6.0-T2, GTM91099-6024-5.0-T2, GTM91099-6024-4.0-T2, GTM91099-6024-T2, GTM91099-6048-12.0-T2

**4. Trade Mark:**  **GlobTek, Inc.**

**5. Model differences provided (if Applicable):** Yes/~~No~~

**6. Model differences verified as per MEITY Guide lines for series formulation:** Yes/~~No~~

**7. Test Results:** Refer below.

#### PART A: GENERAL

| S. NO | TEST REQUIREMENT       | TEST CODE | CLAUSE | VERDICT |
|-------|------------------------|-----------|--------|---------|
| 1.    | Components             | EL 2100   | 1.5    | P       |
| 2.    | Power interface        | EL 2101   | 1.6    | P       |
| 3.    | Marking & instructions | EL 2102   | 1.7    | P       |

#### PART B: PROTECTION FROM HAZARDS

| S. NO | TEST REQUIREMENT                                                | TEST CODE | CLAUSE | VERDICT |
|-------|-----------------------------------------------------------------|-----------|--------|---------|
| 1.    | Protection from electric shock and energy hazards               | EL 2103   | 2.1    | P       |
| 2.    | SELV Circuits                                                   | EL 2104   | 2.1    | P       |
| 3.    | TNV Circuits                                                    | EL 2105   | 2.3    | N/A     |
| 4.    | Limited current circuits                                        | EL 2106   | 2.4    | P       |
| 5.    | Limited Power sources                                           | EL 2107   | 2.5    | P       |
| 6.    | Provisions for earthing and bonding                             | EL 2108   | 2.6    | N/A     |
| 7.    | Over current and earth fault protection in primary circuits     | EL 2109   | 2.7    | P       |
| 8.    | Safety Interlocks                                               | EL 2110   | 2.8    | N/A     |
| 9.    | Electrical Insulation                                           | EL 2111   | 2.9    | P       |
| 10.   | Clearances, Creepage distances and distances through insulation | EL 2112   | 2.10   | P       |

## TEST REPORT

Page 2 of 3

**TEST REPORT NO:** ALPL202009071

**DATE:** 07/12/2020

### PART C: WIRING, CONNECTIONS AND PHYSICAL REQUIREMENTS

| S. NO | TEST REQUIREMENT                                       | TEST CODE | CLAUSE | VERDICT |
|-------|--------------------------------------------------------|-----------|--------|---------|
| 1.    | Wiring, connections and supply                         | EL 2113   | 3      | P       |
| 2.    | Connection to a main supply                            | EL 2114   | 3.2    | P       |
| 3.    | Wiring terminals for connection of external conductors | EL 2115   | 3.3    | N/A     |
| 4.    | Disconnection for the main supply                      | EL 2116   | 3.4    | P       |
| 5.    | Interconnection of equipment                           | EL 2117   | 3.5    | P       |
| 6.    | Stability                                              | EL 2118   | 4.1    | N/A     |
| 7.    | Mechanical strength                                    | EL 2119   | 4.2    | P       |
| 8.    | Design and construction                                | EL 2120   | 4.3    | P       |
| 9.    | Protection against hazardous moving parts              | EL 2121   | 4.4    | N/A     |
| 10.   | Thermal requirements                                   | EL 2122   | 4.5    | P       |
| 11.   | Openings in Enclosures                                 | EL 2123   | 4.6    | N/A     |
| 12.   | Resistance to fire                                     | EL 2124   | 4.7    | P       |

### PART D: ELECTRICAL REQUIREMENTS AND SIMULATED ABNORMAL CONDITIONS

| S. NO | TEST REQUIREMENT                               | TEST CODE | CLAUSE | VERDICT |
|-------|------------------------------------------------|-----------|--------|---------|
| 1.    | Touch current and protective conductor current | EL 2125   | 5.1    | P       |
| 2.    | Electric Strength                              | EL 2126   | 5.2    | P       |
| 3.    | Abnormal operating and fault conditions        | EL 2127   | 5.3    | P       |

### PART E: CONNECTION TO TELECOMMUNICATION NETWORKS

| S. NO | TEST REQUIREMENT                                                                                                                              | TEST CODE | CLAUSE | VERDICT |
|-------|-----------------------------------------------------------------------------------------------------------------------------------------------|-----------|--------|---------|
| 1.    | Protection of telecommunication network service persons, and users of other equipment connected to the network, from hazards in the equipment | EL 2128   | 6.1    | N/A     |
| 2.    | Protection of equipment users from overvoltages on telecommunication networks                                                                 | EL 2129   | 6.2    | N/A     |
| 3.    | Protection of the telecommunication wiring system from overheating                                                                            | EL 2130   | 6.3    | N/A     |
| 4.    | Connection to cable distribution systems                                                                                                      | EL 2131   | 7      | N/A     |

## TEST REPORT

Page 3 of 3

**TEST REPORT NO:** ALPL202009071

**DATE:** 07/12/2020

### **GENERAL INFORMATION:**

1. The conformity certificates of the critical components are verified to ensure complete testing of apparatus under test and details regarding harmonized IEC standards (where IEC standards are not available) are also provided in the list of critical components.
2. All tests have been performed on the model "GTM91099-6048-T2" only

### **CONCLUSION:**

1. Sample meets all relevant requirements of IS 13252 (part 1): 2010 + A1: 2013 + A2 : 2015 / IEC 60950-1 : 2005 + A1 : 2009 + A2 : 2013
2. ~~Sample fails to meet the following test requirements.~~
3. I hereby undertake that the verdict stated in the test reports for all the test matches with the test results. The sample meets all the relevant requirements of IS 13252 (part 1): 2010 + A1: 2013 + A2: 2015 / IEC 60950-1 : 2005 + A1 : 2009 + A2 : 2013/~~does not meet the requirements~~.  
If any deviation found, suitable punitive action may be taken by BIS.

Date: 07/12/2020

(Signature of Authorized person with stamp)

### General product information:

**1) Application details / Description of the product:** The equipment under test (EUT) is Power Adaptor for IT Equipment.

**Item:** Power Adaptor for IT Equipment

**Brand Name:**  **GlobTek, Inc.**

**Model:** Lead Model: GTM91099-6048-T2  
Series Model: GTM91099-3009-4.0-T2, GTM91099-6015-3.0-T2, GTM91099-6015-1.2-T2, GTM91099-6015-T2, GTM91099-6024-6.0-T2, GTM91099-6024-5.0-T2, GTM91099-6024-4.0-T2, GTM91099-6024-T2, GTM91099-6048-12.0-T2

**Weight:** 0.297(Kg)

**Max. specified ambient temperature (°C).....:** 40°C

**Laser classification .....** N/A

TRF No. BIS\_IT/PA\_IS13252\_V1.3

## TEST REPORT

Report No. ALPL202009071

IS 13252 (Part 1): 2010 + A1: 2013 + A2 : 2015 /

Page 12 of 116

Dated: 07/12/2020

IEC 60950-1: 2005 + A1:2009 + A2 : 2013

2) Similarities between the models: Yes

Similarities: Same rated input voltage, Same class of construction, Same mains PCB design layout and transformer

3) Differences between the models: yes

Differences: Model No., Output rating

| S. No. | Model No.        | Output rating                 | Input rating                  |

Model No. tested with-in the family series: GTM91099-6048-T2

3) Options:

The equipment was tested without any optional accessory installed. Hence, this report does not cover parameters that are influenced by the installation of optional accessory that might affect safety in the meaning of this standard.

Tests relating to Marking Requirements

EL 2102 – V1.4

| Cl. No. | Test / Requirement name                                                                                                                                     | Test Code  | Test result/ observation                                                   | Verdict |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|----------------------------------------------------------------------------|---------|
| 1.7.6   | Fuse identification (marking, special fusing characteristics, cross-reference)<br>Fuse(s) shall clearly and adequately marked with fuse number and rating*. | EL 2102-23 | Certified Fuse (FS1) is provided<br>(See table 1.5.1)                      | P       |
| 1.7.7   | Wiring terminals                                                                                                                                            | EL 2102-24 | See below                                                                  | N/A     |
| 1.7.7.1 | Protective earthing and bonding terminals*                                                                                                                  | EL 2102-25 | Class II equipment                                                         | N/A     |
| 1.7.7.2 | Terminals for a.c. mains supply conductors*                                                                                                                 | EL 2102-26 | Not a permanently connected equipment                                      | N/A     |
| 1.7.7.3 | Terminals for d.c. mains supply conductors*                                                                                                                 | EL 2102-27 | Not connected to dc mains supply                                           | N/A     |
| 1.7.8   | Controls and indicators                                                                                                                                     | EL 2102-28 | No such control and indicators                                             | N/A     |
| 1.7.8.1 | Identification, location and marking *:                                                                                                                     | EL 2102-29 | No controls and switches within the EUT                                    | N/A     |
| 1.7.8.2 | Colours*                                                                                                                                                    | EL 2102-30 | No such colors used                                                        | N/A     |
| 1.7.8.3 | Symbols according to IEC 60417*:                                                                                                                            | EL 2102-31 | No such symbol given                                                       | N/A     |
| 1.7.8.4 | Markings using figures* :                                                                                                                                   | EL 2102-32 | No such equipment                                                          | N/A     |
| 1.7.9   | Isolation of multiple power sources*                                                                                                                        | EL 2102-33 | No multiple power source                                                   | N/A     |
| 1.7.10  | Thermostats and other regulating devices*                                                                                                                   | EL 2102-34 | No thermostat or other regulating device                                   | N/A     |
| 1.7.11  | Durability                                                                                                                                                  | EL 2102-35 | Marking is legible and durable after test                                  | P       |
| 1.7.12  | Removable parts*                                                                                                                                            | EL 2102-36 | No such removable parts                                                    | N/A     |
| 1.7.13  | Replaceable batteries*                                                                                                                                      | EL 2102-37 | No battery used                                                            | N/A     |
|         | Language(s)                                                                                                                                                 |            | See above Cl.1.7.13                                                        | N/A     |
| 1.7.14  | Equipment for restricted access locations*                                                                                                                  | EL 2102-38 | Equipment is not intended for installation in a restricted access location | N/A     |

\*- Total number of Requirements to be observed / inspected = 35

Total No of applicable Requirement = 14

No of Requirements for which the sample passed=14

Total number of tests to be conducted = 04

Total No of applicable Tests = 02

No. of tests for which the sample passed= 02

Certificate: It is certified that the above tests were performed and found to be passing in the requirement tested.

| Please insert here a description of the transformer design describing: Concentric windings on bobbin/Core. Windings ends additionally fixed with tape, outer winding is secondary. Teflon tube on all winding exits is provided. Core is considered as primary. |                                                                         |                  |                  |         |                  |         |   |
| Supplementary information: TIW: Tripple Insulated Wire(see table 1.5.1),                                                                                                                                                                                        |                                                                         |                  |                  |         |                  |         |   |
